

## Lab 9 Roles

### Create a role

To add a role named `role1`, enter:

```
$ knife role create role1
```

In the `$EDITOR` enter the role data in JSON:

```
{
  "name": "role1",
  "default_attributes": {
  },
  "json_class": "Chef::Role",
  "run_list": [ 'recipe[cookbook_name::recipe_name],
                role[role_name] '
  ],
  "description": "",
  "chef_type": "role",
  "override_attributes": {
  }
}
```

When finished, save it.

### delete

Use the `delete` argument to delete a role from the Chef server.

### Syntax

This argument has the following syntax:

```
$ knife role delete ROLE_NAME
```
